Subject: Recommendations for Prodeso or Prodeso Heat by Progress Profiles with selected MAPEI products.

To whom it may concern,

MAPEI is pleased to recommend the following products for interior residential or light commercial installations in dry areas only. (see WARRANTY terms for important information.):

1. Installations involving **Ultraflex™ LHT, Ultraflex LFT™ or Ultraflex™ RS** will benefit from our **limited lifetime warranty (hereafter)**.
2. To qualify for the aforementioned warranty terms, grouting must be performed by using **Ultracolor® Plus FA, MAPEI Flexcolor™ CQ, Keracolor® U or Kerapoxy®**.

Prodeso or Prodeso Heat by Progress Profiles can be adhered to plywood or oriented strand board substrate who meets industry APA Sturd-I-Floor standards, group 1 exterior grade, concrete, screed mortar, properly prepared Gypsum based floor with a vinyl floor covering primer, vinyl composition tile, felt-backed vinyl sheets, non-cushioned sheet vinyl, high quality vinyl tile or plank by using one of our above mentioned mortar.

It is possible to use a two-step approach. A. Fill the inner profile of the membrane with the tile setting mortar and allow hardening at least 12 hours (3 hours with a mortar quick-setting). B. Install tiles by employing more tile setting mortar. Our products should be mixed and applied as per our strict instructions contained in the respective technical data sheets.

Based on experience, MAPEI feels that it is good practice to allow for longer drying time before grouting when installing large format tiles (i.e. tile greater than 15" (38 cm) on one or more sides).

Large commercial installations can benefit from MAPEI's Limited Project Warranty. Please contact your local MAPEI Sales Representative to discuss your project.

We wish to thank you for considering MAPEI for your project. Please do not hesitate to contact us at your convenience.

Yours truly,

Pierre Hébert
